Doug/Anthony/Chris,

Much appreciate your time and great feedback this morning. It was good to clarify our primary goal is not to provide a supporting assessment for the SBA decision, this has already been decided, but rather to get after the facility planning/project development necessary to properly support the relocation of 3MED to Kinser. There is consensus on both the III MEF and MCIPAC sides that the facilities 3MED has/is in process of relocating need work to convert and mitigate deficiencies. I anticipate the list of specific facilities requirements for each building will not be insignificant and possibly require a phased approach to close gaps in the short term while we line up longer term requirements with the bigger MLG consolidation/modernization plans. Moving forward we discussed:

- Your team will formulate an initial plan of attack and verify resources and touchpoints/delivery. My understanding is that initial assessments will be Planner-focused, but that a good data set already exists and we can leverage to set constraining facility requirements (BFRs) and identify any critical gaps/surpluses.
- There will be an engineering lift to survey buildings and working with units to develop the supporting work scopes. We're targeting to define the complete scope of work to achieve ideal operational capabilities within the existing Kinser footprint as well as a prioritized subset of work identified that can realistically award for execution between now and Q4 of FY2027.
- We need to reconcile against other plans to properly assess/capture requirements against the Master Plan, such as:
 - UDP3 relocation to Kinser in 2027 – we already identified this impacts bldg. 300 and Food Svc Co relocating from 832, also UH bedspace availability may not support 2 battalions in the near term.
 - Army tenants (HAP) relocation and turnover of building 350.
 - DPRI OKICON planned demolition of Foster 5665 (3/12 Command Post) estimated in 2033. 3MED will turnover facilities on Foster, including bldg. 215 which was the old 3/12 BN HQs.
 - Kinser Tower renovation – assuming the stars align, we have new converted admin facilities planned to relieve some shortfalls of critical CCNs.
 - ICG plans???

As always thank you for all your support!

V/r

Kenji,

Yes, will huddle with you in the morning to come up with a plan as below. Per our larger discussions on MLG we are working a BFR strategy and way ahead to support this and the larger review. More in the morning.

Subject: [External] RE: CG MCIPAC Endorsement Request

Kenji,

Good afternoon, per our discussion, I got the package, thanks for the forward.

Talked with the team, and I can take the Planner side on this, and I would be happy to get started at

time that works for you. I am still tracking down the Engineer on my end and will follow up with a name once I have one. If you would rather hold the kickoff until the Engineer is identified I can do that, or I can start the read in and walk prep now and add them when they come on. Just let us know.

Quick read back, just so I know I am tracking the right scope.

The CG 3d MLG signed letter dated 2 Feb 26 looks to move the entire 3d Med Bn to Camp Kinser, which would cover HQ and Service Company, Alpha Surg Co, Bravo Surg Co, MT and UT, and the MSTC at 711 personnel total. That seems to put the Tab B brief from March 25 and the Tab C installation response from August 25 in a different spot than where the action is now, since both of those were built around a Bravo only move on Camp Foster.

The MCIPAC CG endorsement draft also calls out a Kinser footprint: Bldg. 107 for the battalion (co-use), Bldg. 300 for the MSTC, Bldg. 613 for Motor Transport and Utilities, a dedicated bay in the Bldg. 400 consolidated armory, Bldg. 1225 for housing, and Bldg. 508 for supply. With Mr. Simon's note that the unit has already relocated, my read is that the refresh would lean more toward a walk and documentation pass against that building list than a feasibility study. Please correct me if I have the scope wrong.

If it helps to frame the work, one possible shape for the first sprint would be something like:

1. A walk of the six Kinser buildings to capture current condition and utilization.
2. Netting the Surg Co B functional space (944 SF armory, 3,500 SF warehouse, 800 SF organic storage, 4,063 SF HQs and admin, 2,815 SF applied instruction, 2,848 SF auto org shop, 1,811 SY tactical vehicle laydown, BEQ around 50 beds) against what those buildings offer.
3. Adding what the rest of the battalion brings in, since the 711 consolidated total will drive a different armory, warehouse, and motor T picture than the Bravo only numbers in Tab C.
4. Rerunning the DOTMLPF C and COA stack for Kinser in the Tab C structure so the refresh slots into the existing CG endorsement format.

Open to changing any of that to fit how you want to run it.

One data question if you have a moment. Is there a current iNFADS pull for the Kinser buildings on the list (should I pull it), or would you prefer we treat the walk as the data source? Tab C mentioned some 3d MLG units on Camp Foster operating from buildings without GF documentation (we knew this), and we want to make sure we scope the walk the right way for Kinser.

Whenever you have a chance to talk this through, let me know.

Doug/Anthony,

I need to know what available bandwidth you have to get after the basing assessment. I'm thinking (1) Planner and (1) Engineer can knock this out in a couple weeks. This will also be good primer leading into the bigger 3D MLG deep dive assessment. Let's discuss tomorrow.

Subject: FW: CG MCIPAC Endorsement Request

Mr. Kaye / Mr. Music, good afternoon.

Request Tab C – Basing Installation Assessment for 3d Med Battalion relocation on Camp Kinser IOT complete the CG endorsement for this basing action, the draft is attached for your review and input. + Mr. Jones, DPRI for review of basing endorsement letter.

I know the 3d Med Battalion (+ Surgical Bravo Co.) already relocated to Camp Kinser, basing action endorsements up to MCICOM follows.

Thank you.

Respectfully,
