IN REPLY REFER TO

11000

G-4

2 Feb 26

From: Commanding General, 3d Marine Logistics Group
To: Deputy Commandant for Installations and Logistics (Attn: Facilities and Services Division (George C. Foster, Strategic Basing Program))
Via: (1) Commanding General, III Marine Expeditionary Force
(2) Commander, Marine Forces Pacific

Subj: BASING ACTION REQUEST FOR 3D MEDICAL BATTALION

Ref: (a) MARADMIN 148/20
(b) Basing Action Request for 3d Medical Battalion, Bravo Surgical Company

Encl: (1) Basing Requirements Decision Brief
(2) Proposed Facilities Layout

1. Purpose. 3d Medical Battalion (3d Med Bn) is disaggregated throughout Camp Foster and Camp Kinser with various elements that are out of position to provide cohesive and timely support to III Marine Expeditionary Force (III MEF). In tangent to the relocation of Bravo, Surgical Company, reference (b), 3d Med Bn seeks to consolidate its elements on Camp Kinser. III MEF requires eight Surgical Platoons to meet wartime requirements but is only staffed to three within the First Island Chain (FIC). III MEF must consolidate its Role 2 structure on Okinawa where it will be most effective and able to support mission requirements.

2. Background. Relocation of 3d Med Bn to Camp Kinser enables the battalion to co-locate Alpha Surgical Company, Bravo Surgical Company, Headquarters and Services Company, including the Motor Transportation and Utilities (MT/UT) section and the Medical Skills Training Center (MSTC). Due to the limited adequate space on Camp Foster, 3d Med Bn has already relocated the MT/UT section and MSTC to Camp Kinser. Under efforts to maximize space on Camp Foster, the MT/UT section was reallocated under Combat Logistics Regiment 3. While this allocation allowed for maximization of Camp Foster motor pool space, it did not facilitate tactical medical operations. The MSTC, which provides basic to advanced medical training and skills currency to all of III MEF, was in a warehouse space that did not provide adequate equipment storage or an adequate training area to simulate medical operations in a tactical field environment year-round.

3. Impacts. 3d Marine Logistics Group (3d MLG) conducted an internal assessment that identified a way ahead in which 3d Med Bn, in its entirety, can relocate to Camp Kinser. The current tenants of each of the impacted facilities are 3d MLG units. Consolidation into the listed facilities maximizes 3d MLG's use of its allocated buildings while increasing unit integrity. Furthermore, basing 3d Med Bn on Camp Kinser improves the operational posture as Medical Logistics Company, Combat Logistics Regiment 35 (MEDLOG, CLR-35) is already on Camp Kinser. This proximity vastly improves response time, as MEDLOG houses all the deployable medical equipment used by 3d Med Bn.

4. Request. III MEF, 3d MLG formally requests current Basing Actions aboard Marine Corps Base Butler (MCBB), Camp Kinser, Okinawa Japan, for 3d Medical Battalion.

5. Space Requirements

Subj: BASING ACTION REQUEST FOR 3D MEDICAL BATTALION

a. Personnel: 711

b. Workspace: Per enclosure (2)

6. Point of contact. Maj Ronald Lima, 3d MLG G-4 Operations Officer, can be contacted at ronald.lima@usmc.mil and at 637-1109.
